

## Remote Repping Functionality

Below you will see the remote repping functionality in replace of the Bid/Max Bid buttons on the screen of the user who is the seller for the vehicle on the block. In the grid to the left, the user/seller is notified of which lots are theirs including the Floor Price that was put against the vehicle.

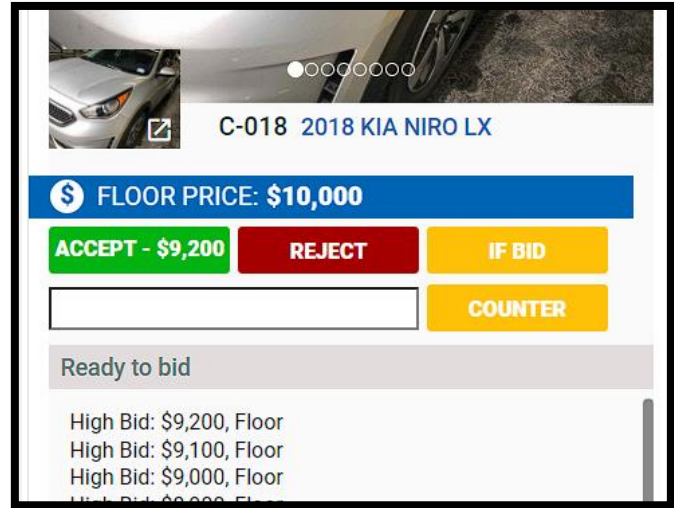

**ACCEPT** – Clicking the Green Accept button will let the auctioneer/clerk know that they have accepted the bid offer.

**REJECT** – Clicking the Red Reject button will let the auctioneer know that you have declined the bid offer.

**IF BID** – Clicking the Yellow IF Bid button will let the auctioneer know to sell the vehicle as an IF.

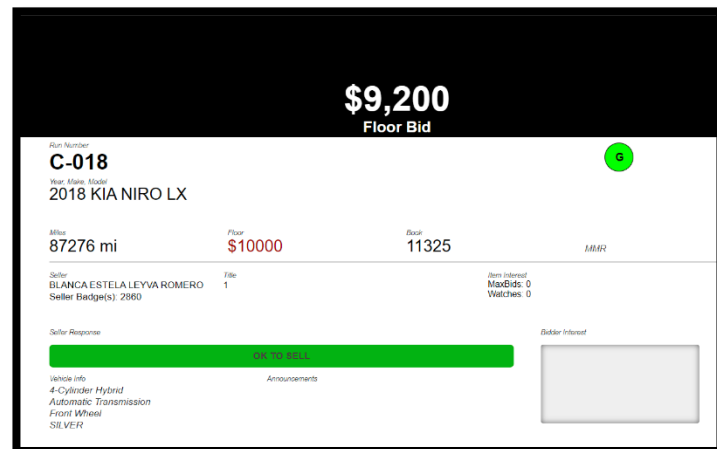

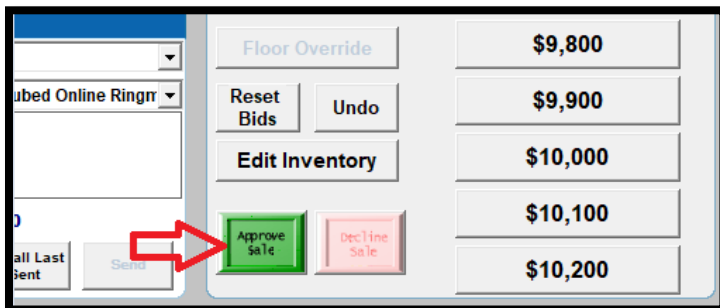

**COUNTER** – You may type in a counteroffer amount in the text box. Once you have typed in the amount and click the Yellow Counter button, the counter amount will be notified to the online bidders as well as the Auctioneer. From there, they can accept or decline the counteroffer amount.

Once bidding has started, the Accepted button will change to show the current high bid. The bid history will also display the bids coming in as normal.

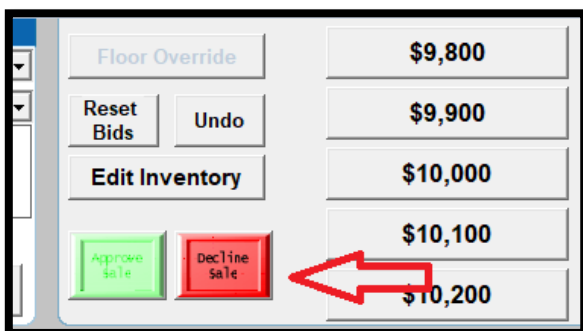

When bidding slows down and the Auctioneer wants to sell/move on to the next vehicle, the rep has the choices above to notify the clerk/auctioneer on what to do.

By clicking **Accept** button, the Clerk/Auctioneer will see the below ->

By clicking **Reject** button, the Clerk/Auctioneer will see the below ->

By clicking **If Bid** button, the Clerk/Auctioneer will see the below ->

FLR 10000 Bk 11325

Proposed Bidder Accepted Bidder Floor

Not Available Online Change Bid \$9,200

GR YL RD BL WH Sell
