

Sr. Cloud Engineer and Architect

About Us

Xcira, a Tampa-based Software as a Service company with approximately fifty employees, is the premier technology supplier to the asset disposition (auction) industry. Xcira's unparalleled combination of innovation, enterprise-level systems and outstanding customer service are the cornerstones of this rapidly growing corporation and has provided the basis for Xcira to build long-term relationships with the undisputed leaders in the construction, fine art, wholesale automotive, automotive salvage, livestock, collectibles auction segments in North America as well world-wide.

We are currently looking for team players to help design, develop, and maintain our mission critical cloud enterprise solutions. Our rapid growth has created tremendous opportunities for our employees. We are seeking a candidate to join our application development team. We have many opportunities to expand your skill set and learn new things.

The ideal candidate will thrive in a faced-paced work environment requiring strong problem-solving skills coupled with an aptitude for team collaboration and open communications.

Successful candidates will have the following qualifications:

- Experience designing mission critical enterprise systems with a focus on improving system and application infrastructure, scalability, effectiveness, and performance while at the same time controlling costs
- Experience in using AWS services such as EC2, S3, VPC, Route 53, Elastic Beanstalk, SMS, IAM, Groups, SNS, Cloud Watch, Amazon MQ, Amazon SQS, etc.
- Experience architecting and implementing EC2 applications using auto-scaling techniques and technologies
- Experience architecting and implementing application and infrastructure monitoring capabilities for AWS
- Demonstrate the ability to guide team members in understanding and implementing highly scalable AWS architectures and assisting in coding, debugging, and supporting those systems
- Experience with Agile best practices such as containerization methodologies and other strategies including continuous integration/continuous delivery and technologies that enable it such as Bamboo, Puppet, Foreman, Docker, Kubernetes
- Experience with Middleware technologies such as Tomcat, Jetty, Active MQ, Apache, HA Proxy
- Bachelor's degree in Computer Science, Information Technology, Math, Engineering, or other technology related discipline from an accredited institution
- Five (5) years' experience working with AWS Cloud-based technologies

Additional Experience and skills that we would like to see:

- Experience in other cloud platforms and hybrid cloud approaches
- Experience in other CI/CD technologies such as CFEngine, Chef, Ansible, etc.
- Exposure or experience in mission critical real-time applications
- Ten (10) years professional Information Technology experience

Xcira is highly committed to the training and development of and respect for our employees. We are a Drug-Free Workplace and offer a competitive salary package based on experience, a benefits package including a 401K Plan, and unlimited growth potential. Xcira offers a great working environment that is both highly professional, yet informal. We promote a relaxed, open-door atmosphere, along with entrepreneurial ideas and actions on the part of all employees. We currently do not offer any relocation. US Citizens and Green Card holders are encouraged to apply. We are currently unable to sponsor H1B candidates or transfer a visa at this time.

Please submit resume AND salary requirements for immediate consideration.
